July 25, 2010

Dear Honors Algebra I Student;

Congratulations! You have met the qualifications to participate in the Honors Algebra I class for the school year 2009-2010. The philosophy of starting Algebra in the eighth grade is to allow students the chance to complete five years of mathematics at graduation. Students are expected to take one of the AP Calculus classes their senior year of High School. The Algebra I class is awarded a Carnegie unit toward high school graduation, which is included in the final high school class ranking. The state has mandated that a grade of WF will be recorded on the student's record if the class is dropped after the tenth class meeting.

Please take time to discuss this opportunity with your parents. If you have any questions, feel free to call the Guidance office (654-1400).

Sincerely,

Gary Culler
Principal

Mary Bridges
Assistant Principal
